

Found. Answered. Booked.

How GallivanAI gets aesthetics, longevity, dental and wellness clinics found on Google, Maps and AI search, answers every enquiry, and measures what changed. One founder, from the first call to launch.

HOW IT WORKS

01

Found

Google & Maps rankings, your Google Business Profile and reviews, and AI search set-up (llms.txt, structured data, treatment pages) so ChatGPT, Claude and Perplexity can read you and recommend you.

02

Answered

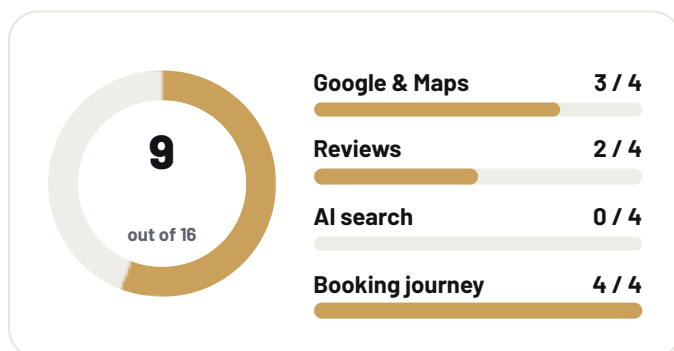

Web chat that answers everyday questions in seconds and books the consultation, day or night. Anything clinical goes straight to you. Phone, WhatsApp and Instagram as a founding pilot.

03

Booked

A booking-first website with one clear button and one diary, content that ranks and converts, and follow-up that turns "maybe" into an appointment.

MEASURED, NOT GUESSED

Illustrative score card. Every client starts with a baseline audit, then we re-measure at 30, 60 and 90 days: rankings, reviews, AI mentions and enquiries, each with its source.

- **Free Clinic Visibility Check:** 8 questions, your score out of 16, a fix list. 2 minutes.
- **Clinic Visibility Audit (£250):** a written report ranked by what each issue costs you. Credited in full against any work.
- **Works with what you have:** Fresha, Pabau, Treatwell and your Google profile keep their roles.

Prices (no VAT charged)

Clinic Visibility Audit	£250
Monthly visibility plan	£395 / mo
Get Found & Get Booked	£950 + £149 / mo
